SOFTWARE ARCHITECT & DESIGNER

I build bridges between complex systems and beautiful interfaces.

I'm a Computer Science student and lifelong learner based in the Philippines. From architecting collaborative IDEs to brewing the perfect Moka pot, I am obsessed with the craft of building systems that are as robust as they are visually compelling.

PORTFOLIO SELECTED WORKS

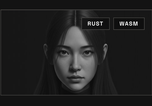
Here's what I'm building...

VIEW ALL PROJECTS →

Visual Node Editor

A highly modular canvas-based editor for logic flow orchestration. Built with precision for developers who need visual feedback on complex data structures.

SYSTEMS ARCHITECTURE UI/UX ENGINEERING



TLEV-IDE Engine

A high-performance text manipulation engine built for the web. Optimized for low-latency collaborative editing and extreme scalability.

COMPILER DESIGN PERFORMANCE OPS

PERSONAL LOG

A life-long learner.

My philosophy is simple: master the foundations, then break the rules. I treat my development environment and my coffee bar with the same level of obsessive engineering.

CURRENTLY LEARNING

Clean Architecture & Domain Driven Design for high-scale microservices.

CURRENT OBSESSION

Moka pot coffee: Dialing in the perfect extraction for light-roast beans.

NEXT MILESTONES

Contributing to core low-level graphics libraries in the Rust ecosystem.
